OVERVIEW

Project management and risk management are essential skills for professionals involved in managing projects and making informed decisions. This Management Development Programme (MDP) is designed to provide participants with practical skills in project management and risk management. The programme will cover key concepts, tools, and techniques in project and risk management, enabling participants to effectively plan, execute, and manage projects while mitigating risks.

DAY-WISE TOPICS

Day 1: Introduction to Project Management

- Overview of project management
- Project lifecycle and phases
- Project management methodologies (Waterfall, Agile, etc.)

Day 2: Project Planning and Scheduling

- Project planning process
- Work breakdown structure (WBS)
- Gantt charts and project scheduling

Day 3: Project Execution and Control

- Project execution process
- Project monitoring and control
- Change management in projects

Day 4: Risk Management in Projects

- Introduction to risk management
- Risk identification and assessment
- Risk mitigation and response planning

Day 5: Advanced Topics in Project and Risk Management

- Project closure and lessons learned
- Project management tools and software
- Case studies and best practices in project and risk management

KEY BENEFITS

- Gain practical skills in project management and risk management
- Learn how to effectively plan, execute, and control projects
- Understand how to identify, assess, and mitigate risks in projects
- Acquire hands-on experience through practical exercises and case studies
- Network with industry experts and peers in the field of project and risk management

WHO SHOULD ATTEND

- Project managers
- Team leaders
- Risk managers
- Anyone involved in managing projects or making informed decisions

FACULTY

The programme will be conducted by experienced risk management professionals and faculty members with practical industry experience.

CERTIFICATION
